Stud Layout – the Easy Way

Kapro has designed a level that holds the stud for you – the 773 Stud Layout Level

With
Rare-earth
magnetic
stud slots

1

Place the metal studs in the level's magnetic stud slots.

2

Move the studs into position and anchor them with both hands while the 773 magnetically holds the studs in place.

3

Check the plumb of the stud through the Plumb Site® viewer.

Magnetic milled
base holds the
level against the
vertical stud.

Stud layout has never been easier.
